KEY TO BOND RATINGS

MOODY'S LONG TERM DEBT RATINGS

Aaa
Bonds which are rated 'Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa
Bonds which are rated 'Aa' are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risk appear somewhat larger than the Aaa securities.

A
Bonds which are rated 'A' possess many favorable investment attributes and are to be considered as upper-medium-grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment some time in the future.

Baa
Bonds rated 'Baa' are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba
Bonds which are rated 'Ba' are judged to have speculative elements; their future cannot be considered as well-assured. Often the protection of interest and principal payments may be very moderate, and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B
Bonds which are rated 'B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa
Bonds which are rated 'Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca
Bonds which are rated 'Ca' represent obligations that are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C
Bonds which are rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Issuers rated Prime-1 (or supporting institutions) have a superior ability of repayment of senior short-term debt obligations. Prime–1 repayment ability will often be evidenced by many of the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structure with moderate reliance on debt and ample asset protection.
- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.
- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated Prime-2 (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated Prime-3 (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

STANDARD & POOR'S DEBT RATINGS

AAA
Debt rated 'AAA' has the highest rating assigned by Standard & Poor's. Capacity to pay interest and repay principal is extremely strong.

AA
Debt rated 'AA' has a very strong capacity to pay interest and repay principal and differs from the highest rated issues only in a small degree.

A
Debt rated 'A' has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher related categories.

BBB
Debt rated 'BBB' is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic

conditions or charging circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

BB
Debt rated 'BB' has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments. The 'BB' rating category is also used for debt subordinated to senior debt that is assigned an actual or implied 'BBB–' rating.

B
Debt rated 'B' gas a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The 'B' rating category is also used for debt subordinated to senior debt that is assigned an actual or implied 'BB' or 'BB–' rating.

CCC
Debt rated 'CCC' has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The 'CCC' rating category is also used for debt subordinated to senior debt that is assigned an actual or implied 'B' or 'B–' rating.

CC
The rating 'CC' typically is applied to debt subordinated to senior debt that is assigned an actual or implied 'CCC' rating.

C
The rating 'C' typically is applied to debt subordinated to senior debt which is assigned an actual or implied 'CCC–' debt rating. The 'C' rating may also be used to cover a situation where a bankruptcy petition has been filed, but debt service payments are continued.

CI
The rating 'CI' is reserved for income bonds which no interest is being paid.

D
Debt rated 'D' is in payment default. The 'D' rating category is used when interest payments or principal payments are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition if debt service payments are jeopardized.

Plus (+) or minus (–): The ratings from 'AA' to 'CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

NR
The security is not rated.

STANDARD & POOR'S COMMERCIAL PAPER RATINGS

A Standard & Poor's commercial paper rating is a current assessment of the likelihood of timely payment of debt considered short-term in the relevant market.

Ratings are graded into several categories, ranging from 'A-1' for the highest quality obligations to 'D' for the lowest. These categories are as follows:

A-1
This highest category indicates that the degree of safety regarding timely payment is strong. Those issues determined to possess extremely strong characteristics are denoted with a plus sign (+) designation.

A-3
Issues carrying this designation have adequate capacity for timely payment. They are, however, more vulnerable to the adverse effects of changes in circumstances than obligations carrying the higher designations.

B
Issues rated 'B' are regarded as having only speculative capacity for timely payment.

C
This rating is assigned to short-term debt obligations with a doubtful capacity for payment.

D
Debt rated 'D' is in payment default. The 'D' rating category is used when interest payments or principal payments are not made on the date due, even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such a grace period.

A commercial paper rating is not a recommendation to purchase, sell, or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to Standard & Poor's by the issuer or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

KEY TO BOND TYPE OF CLASSIFICATION

ABS
Asset Backed Securities - securities collateralized by assets that are not mortgage loans.

AGY
Agency Securities - securities issued by federally related institutions and U.S. government-sponsored entities.

BA
Bankers' Acceptance - A bankers' acceptance is a credit instrument used to finance both domestic and international self-liquidating transactions. By definition it is ". . . a draft or bill of exchange, whether payable in the United States or abroad and whether payable in dollars or some other money, accepted by a bank or trust company, or a firm, company, or corporation engaged generally in the business of granting Bankers' acceptance credits."

BILL
Bill - A Treasury bill is an obligation of the United States Government to pay the bearer a fixed sum after a specific number of days from the date of issue. These debt instruments are sold by the U.S. Treasury at a discount through competitive bidding, and the return to the investor is the difference between the purchase price and the face or par value.

BOND
Bond - A bond is a creditor instrument, a corporate or governmental obligation to repay the loan at some future maturity date.

CD
Certificate of Deposit - A negotiable certificate of deposit, or CD, is a marketable receipt for funds deposited in a bank for a specific period at a specific rate of interest. The owner of the CD at the time of its maturity receives both principal and interest, while its readily salable feature enables the original purchaser to retrieve his funds before maturity by selling the instrument to another holder.

CBO
Collateralized Bond Obligation - Notes which are secured by a pool of corporate bonds.

CMO
Collateralized Mortgage Obligation - Bonds which are secured by a pool of residential mortgages or mortgage pass-through securities. The cash flows generated by the mortgages in the collateral pool are used to pay principal and interest to bondholders.

CP
Commercial Paper - Commercial Paper refers to short-term unsecured promissory notes sold by large businesses at a discount to dealers, institutional investors, and other corporations. Since the notes are unsecured and bear only the name of the borrower, the market has generally been dominated by large corporations with impeccable credit ratings. Notes are issued in multiples of $1,000, ranging upward to $5.0 million or more. Maturities may vary from 30 to 270 days. Paper maturing beyond 270 days must be registered with the Securities and Exchange Commission. This requirement excludes the use of maturities greater than 270 days.

CONV
Convertible - Under the terms of the bond indenture, the holder may exchange the bonds for stock of the corporation issuing the bond.

DEB
Debenture - Debentures are unsecured bonds protected only by the general credit of the borrowing company.

DEMAND
Demand - an account from which deposited funds can be withdrawn at any time without any notice to the depository institution.

DN
Discount Note - Discount Notes are noninterest-bearing money market instruments that are issued at a discount and redeemed at maturity for full face value.

FRN
Floating Rate Note - Interest-bearing debt security, issued both in the U.S. and the Euromarket, on which the interest rate is indexed to a short-term instrument, generally three- or six-month LIBOR or Treasury bills.

GA
Government Agency - See AGY (Agency Securities).

GOVT
Government - Direct obligations of the federal government.

I/O
Interest Only - Bonds that receive some or all of the interest portion of the underlying collateral and little or no principal. I/O bonds have either a notional or nominal amount of principal.

MBS
Mortgage Backed Security - Bonds backed by an undivided interest in a pool of mortgages or trust deeds. Income from the underlying mortgages is used to pay off the securities.

NOTE
Note - Coupon issues with a relatively short original maturity are often called notes. Treasury notes are coupon securities that have an original maturity of up to 10 years. (Also see "Commercial Paper")

OPTION
Option - A contract in which the seller of the option grants the buyer of the option the right to purchase from, or sell to, the seller a designated instrument at a specified price within a specified period of time.

REPO
Repurchase Agreement - A repurchase agreement consists of two simultaneous transactions. One is the purchase of securities (collateral) by an investor from a bank or dealer. The other is the commitment by the bank or dealer to repurchase the securities at the same price at some mutually agreed future date. The collateral most frequently used is Treasury, GNMA or other agency securities, but may include any of the better-known money market instruments.

STEPPED RATE
Stepped Rate - an interest rate that increases to predetermined levels on specific dates as stated in the bond indenture.

STRIP
Zero Coupon Bond - see Zero Coupon Bon

SWAP
Swap - an agreement whereby two parties agree to exchange periodic payments. The dollar amount of the payments is based on a notional principal amount. The dollar amount each counterparty pays to the other is the agreed upon periodic

factor multiplied by the notional principal amount. The factor may be based on interest rates, currency, or other economic indicators.

TRIPARTY
Triparty - a repurchase agreement (See REPO) in which a custodian bank acts as an intermediary between the two parties to the repo.

UST
United States Treasury obligation.

VARIABLE RATE
Variable Rate - a floating interest rate that is reset at specified intervals according to a predetermined formula.

VRN
See FRN (floating rate note).

ZERO COUPON BOND
Zero Coupon Bond - a Debt obligation issued without coupons at a substantial discount from its maturity value. The interest received by the investor is the difference between the purchase price and the redemption value.
